Mark Manczyk joined Omni Architects in 2016 after learning of the firm's reputation for design, service to their clients' needs, and a culture that cares about its own people and their families - a philosophy very much in line with his own values.

Mark brought to Omni his skills in creating visualization tools that help clients envision the potential for their project, and in generating detailed Building Information Models (BIM). His ability to detect potential issues and coordinate solutions before they become problems is a valuable asset to Omni's project teams and to our clients.

PROFESSIONAL EXPERIENCE

Advanced Manufacturing Center Bluegrass Community & Technical College

Georgetown, KY

The new 77,500 SF campus provides students with advanced training in Industrial and Mechanical Technical Programs. Project cost of \$24,000,000.

Advanced Manufacturing & Information Technology Center Jefferson Community & Technical College

Louisville, KY

The new 58,000 SF facility will provide workforce ready skills training in the industrial & information technology fields. Project cost of \$20,240,000.

Advanced Manufacturing Center Expansion Bluegrass Community & Technical College

Danville, KY

The expansion covers a 13,655 GSF addition that includes high bay training spaces, 2 new classrooms, a computer classroom and collaboration spaces along with restroom and service functions to compliment the existing facility. Project cost of \$3.5 Million.
